JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Furthermore, the material relating to the Far East, especially that relating to China, has been considerably enlarged. In view of the conditions under which this publication has been issued the editors are to be congratulated on the content of the 1915 edition.

L. S. R.

NEWELL, FREDERICK HAYNES. *Irrigation Management*. Pp. x, 306. Price, \$2.00. New York: D. Appleton and Company, 1916.

The fundamental problem connected with irrigation is not concerned with concrete and the digging of ditches. The main question and the real difficulty really arise when the dams are built and the water is stored behind them. To properly utilize the irrigation systems and to get fair returns from the land irrigated are the vital problems to be solved.

With this as his thesis, Mr. Newell treats some of the specific difficulties which grow out of it. Thus he discusses the methods of operation, operation organization, the legal aspect, and various other problems.

The book contains a great deal of valuable information for the man actually engaged in the work. In this connection, it might be suggested that a few more illustrations would not be amiss. For college work, it should form an excellent basis for class discussion.

Much of the material in the book has been put forth before in one form or another. But the book strikes one or two new notes, as for instance, in the chapter on the importance of the human factor. As a whole it forms a collection of instructive data, rather well arranged.

J. S. K.

RIPLEY, WILLIAM Z. *Trusts, Pools and Corporations* (Revised). Pp. xxxiii, 872. Price, \$2.75. Boston: Ginn and Company, 1916.

Since the publication of the first edition of this work in 1905, there have been many important changes in the organization and regulation of industrial combinations. The decisions of the Supreme Court in the Standard Oil Company and the American Tobacco Company suits, the application of the principle laid down in these cases, and the enactment of the Clayton law and the Trade Commission law have been the outstanding features of a new and important period. In this edition Professor Ripley presents the leading documentary and other descriptive material concerning both the earlier and the recent phases of the "trust" problem.

T. W. V. M.

ROBINSON, CHARLES M. *City Planning: with special reference to the Planning of Streets and Lots*. Pp. xiii, 344. Price, \$2.50. New York: G. P. Putnam's Sons, 1916.

Town planning has acquired the distinction of being both the art and science of laying out cities to serve the business requirements, convenience, health and comfort of the public. Mr. Robinson's book teaches the methods of town planning. It not only carries the merit of creating within the reader a stronger desire
